# 10 CAMP COMMANDMENTS

## 1. Openness

Anyone is welcome to participate in the Immersjawn experience. We respect and welcome strangers. There are no prerequisites for involvement at immersjawn.

## 2. Make it Special

Immersjawn is dedicated to presenting gifts. The value of a gift is not contingent. The act of giving does not anticipate a return or an exchange for an item of equal value.

## 3. No Shmoney

To preserve the spirit of gifting, our community strives to establish social environments unmediated by commercial sponsorships, transactions, and advertising. We are prepared to defend our culture against such exploitation. We oppose the substitution of consumption for experiential participation.

## 4. You Got You

Immersjawn encourages people to discover, exercise, and rely on their interior resources.

## 5. Express Yo'Self

The unique qualities of the individual inspire radical self-expression. Its content can only be determined by the individual or a group of collaborators. It is presented to others as a gift. In this spirit, the benefactor should respect the recipient's rights and freedoms.

**NO  
ALWAYS  
MEANS  
NO.**

## 6. Togetherness

Our community values collaboration and creative cooperation. We endeavor to produce, promote, and safeguard social networks, public spaces, works of art, and communication methods that facilitate such interaction.

## 7. The Law is the Law

We appreciate civil society. Members of the community who orchestrate events should assume responsibility for the public good and strive to impart civic responsibilities to participants. Additionally, they must be accountable for conducting events in accordance with local, state, and federal laws.

## 8. Make it Better

Our community is environmentally conscious. We are committed to leaving no traces of our activities wherever we congregate. We clear up after ourselves and make every effort to leave such places in a better condition than when we arrived.

## 9. Do Yer'Part

Our community embraces a radical ethic of participation. We believe that transformative change, whether in the individual or in society, is only possible through profoundly intimate participation. Being is attained through action. Everybody is welcome to labor. Everyone is welcome to participate. We make the world real through heart-opening actions.

## 10. Now or Never

In many respects, immediate experience is the most significant metric of value in our culture. We attempt to overcome obstacles that prevent us from recognizing our inner selves, the reality of those around us, participation in society, and contact with a natural world that surpasses human capabilities. No concept can replace this experience.

# ART CAR RIDES

ALL ABOARD! LIMITED RIDES SO DON'T MISS IT

## Hogwarts Express

Using a blend of cutting edge special effects, projections, live action, puppetry, and surround sound, the Magic Express art car takes its riders on an emotional rollercoaster ride of unparalleled storytelling and adventure. Our riders experience fast accelerations, unpredictable twists and turns, high speeds, sudden halts, and turbulence as they adventure into the exciting unknown on 3 different incredible journeys that spark the imagination and inspire the inner child in us all. To say that the Magic Express art car packs a punch would be an understatement, as we take our riders on 3 original adventures that leave people breathless, with a smile on their faces, and no doubt wanting more. Encounters with killer bees, battling aliens, escaping the crushing fists of rampaging giants, and frolicking with fairies are only a fraction of what our riders have been told to experience on each journey. No matter

what our riders may face that stands in their way, they can count on our magical cast and crew to always return everyone home safely. Well- almost everyone. Mostly everyone with the exception of a few that were abducted by hostile aliens... and the riders that never managed to escape that giant spider's web... and I guess there were the few that vanished while battling a rouge band of dark wizards... Nevertheless, besides all of them we almost always return our riders safe and satisfied. So hop on board, get ready to ride with Rob Potter as your guide. What you're going to encounter will tickle you deep inside. From everyone in our cast and crew of the Magic Express art car, we would like to thank you in advance for your patronage, and we hope you all have a magical filled night- don't let the Jersey devil bite!!

Time: Saturday NOON  
Location: Rabbit Hole  
In this workshop we will begin by defining inner freedom. What is inner freedom? and what does it take to discover... and even INCREASE your experience of it? Just so we're on the same page. Next, we will take a couple minutes to go over a SIMPLE model, which can be a helpful pointer to develop the skill of embodying this practice. Again, just for CLARITY. Finally, (the BEST part!) we'll take a journey of self-inquiry and discover FOR OURSELVES if we can find, access, and MAGNIFY this inner freedom! Afterwards, there will be time to share YOUR experience

(if you'd like...no pressure) and ask any questions you may have. I look forward to meeting each of you and sharing this profound gift together.

## **Harvey Disco Kitty**

Here is a snippet from the article in

"Burn Before you Read" Written by Michael

"Dustin" Fasman

What do you do with a pile of scrap metal and an RV chasis? Make an art car of course!

March 2022 with only 6 months before Burning Man Shiny Galeani, Benjamin Jones, and Evan Collier came together in the town of Nyack, about 30 miles north of New York City. One day Shiny and Evan were in the shop scrap yard looking at excess scrap and she recounted "This is so wasteful, we really should make some kind of art project with this" within a few

days Ben came up with the concept of a cat and drew some sketches. This project is a cannab- alism of an RV taken to the playa in 2012 called “Harvey” and using it’s carcass “Harvey Disco Kitty” was born.

This was the commu- nal effort of about 30 burners from the New York community, bring- ing resources together to up-cycle items from many local metal fab- rication shops. It didn’t look like a cat at all for some time.

“I didn’t think we were going to tonight in time” said Shiny, the team’s biggest challenge was learning “The biggest difference perfection and safety, releasing anxiety of things being perfect and just saying whatever it’s gonna, what it’s gon- na be, and that’s great, and working on a team where we can all say that and actually mean it” after some struggles getting the art car to the playa, it made it home. Which lovingly was deemed the “people’s art car”
